

Directions For Use:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Mix

- Open a packet using a pair of scissors.
- Add the contents of the packet to a clean mixing container holding 2.5 gallons/10 liters of water.

2. Stir

- Stir the powder vigorously in the water for 5 minutes. Be sure a vortex is created when stirring. Then, let the water stand for 5 minutes until it becomes clear.
- After adding the powder to the water, the water will become colored. The color indicates that the product is working. When the process is finished, the water will be crystal clear.

3. Filter

- If you see the water is still colored, you can stir again and let it rest for another few minutes.
- Once the water looks clear, and the floc is at the bottom of the container, filter the water through a clean cloth filter into a clean storage container and cover it with a lid.
- The filter must be a clean, thick 100% cotton cloth, without holes, that prevents the floc from passing through. Carefully pour the clear water through the cloth into a container. The floc will be left behind in the bottom of the container and in the cloth filter.
- Discard the floc from the water treatment process in the latrine, or on the ground away from children and animals. Rinse and wash the cloth thoroughly before reusing.

4. Before Drinking

- **Wait 20 minutes** before drinking the water.
- Do not drink water if it is colored or cloudy after treatment. If the floc accidentally gets into the treated water, use another cloth to filter the floc out of the treated water. The water is still good to drink.
- Drink treated water within 24 hours after its preparation. Water that is not consumed may be used for cooking, washing, watering animals or otherwise discarded.
- **ALWAYS** dispense the water from the storage container into another container, such as a cup or glass for drinking.

Precautionary Statements:

Hazards to humans and domestic animals.

WARNING: Dry product causes substantial but temporary eye injury. Harmful if absorbed through skin or if swallowed. Avoid contact with skin or clothing. Do not get in eyes. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse. Contains Iron Sulphate (352mg ferric iron).

First Aid:

IF IN EYES:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call poison control center or doctor for treatment advice.

IF ON SKIN:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call poison control center or doctor for treatment advice.

IF SWALLOWED:

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to by a poison control center or doctor.
- Do not give anything to an unconscious person.

Have the product container or label with you when consulting a poison control center or doctor, or going for treatment. In North America you may also contact 1-866-461-4403 for emergency medical treatment information.

Storage / Disposal:

- Store away from heat, humidity and sunlight. Dispose of empty container in trash.
- Dispose of floc in latrine or on the ground away from humans and animals.
